

1 HYDRAULIC CYLINDER

Treatment: CLINTM
Info: High Corrosion resistance
Info: High Corrosion resistance, good friction properties, Seizure & wear resistance
Environmental alternative to Hard chromium / High corrosion resistance & improved friction properties

2 ARTICULATION PIN

Treatment: CLIN™
Info: High Corrosion resistance, good friction properties, seizure & wear resistance

3 BUSHINGS:

PEL type or H liner bushings
Info: bushings with high abrasive wear and seizure resistance for a longer lifetime, with or without lubrication. Solution widely used on various types of implements: ploughs, cultivators, seeders, planters, loaders, trailers, harvesters...

4 TRACTOR REAR HITCH:

PEL-LV bushings
Info: Longer lifetime, less wear, under heavy load and vibrations conditions.

5 POWER CELL COMPONENT: PISTON PIN

Treatment : CERTESS™ CARBON
Info: Diamond-like carbon (DLC) coating to prevent seizure, wear, extend component lifetime and increase overall engine reliability

6 ENGINE VALVE

Treatment: CLINTM
Info: Improved durability & superior corrosion resistance

7 VALVETRAIN COMPONENTS : ROCKERS AND ROCKER ROLLER PIN

Treatment : CERTESS™ CARBON
Info: Diamond-like carbon (DLC) coating to make your valvetrain more robust, extend its lifetime and decrease engine maintenance cost

8 TRACTOR FRONT AXLE:

PEL-BH or H-Liner Bushings
Info: bushings with high seizure and abrasive wear resistance for a longer lifetime with or without lubrication.

9 ROCKER ARM & SHAFT :

Treatment CLIN™
Info: Improved durability and excellent adhesive wear resistance

10 TRACTOR FRONT AXLE:

PEL-BH or H-Liner Bushings
Info: bushings with high seizure and abrasive wear resistance for a longer lifetime with or without lubrication.
